

KHALIL HOUSHEYA

Backend Developer & Information Systems Student

Saint Petersburg, Russia | khalilayed777@gmail.com | [linkedin.com/in/khalil-housheya](https://www.linkedin.com/in/khalil-housheya) | github.com/Khalil-Pal
| t.me/khalil_ayed

SUMMARY

Information Systems & Technologies student (LETI, Saint Petersburg) focused on backend development with Java, Spring Boot, and PostgreSQL. Shipped a Telegram bot used by real users in production, and designed a race-condition-safe request-matching engine for a humanitarian aid platform. Trilingual: Arabic (native), English (fluent), Russian (professional working proficiency).

EDUCATION

Saint Petersburg State Electrotechnical University “LETI” — B.Sc. Information Systems and Technologies

Sep 2023 – Aug 2027 (Expected) | Saint Petersburg, Russia

Certified Front-End Developer — Yandex Education | 2025–2026

EXPERIENCE

IT Assistant Intern — Al-Quds Open University

Jun 2026 – Jul 2026

- Reviewed and organized technical documentation for internal use
- Set up and configured a computer lab ahead of scheduled lectures
- Provided hands-on technical support to staff and students
- Edited and produced a video for the university's graduation ceremony

Database & IT Assistant Intern — Ward Company Trading Vehicle

Mar 2026 – Jun 2026

- Managed and maintained company databases
- Provided general IT support across departments
- Supported documentation and data processes for vehicle import procedures

PROJECTS

Nidaa — Full-stack humanitarian aid platform — Java, Spring Boot, Spring Security, PostgreSQL, JWT, REST APIs

- Built a platform connecting people in need with volunteers, organizations, and psychologists for material and psychological aid
- Implemented priority scoring and geolocation-based matching to route each request to the nearest available responder
- Designed a race-condition-safe matching engine using atomic conditional SQL updates, so two simultaneous requests can never be assigned the same volunteer
- Code: github.com/Khalil-Pal/Nidaa-project

Sandy Squirrel Bot — Telegram bot, live in production — Python, aiogram, PostgreSQL, FFmpeg, LibreOffice, Pandoc, GitHub Actions

- Built and deployed a Telegram bot that downloads media from YouTube, Instagram, and Facebook, and converts documents, images, and audio/video files directly in chat
- Automated the build and release workflow using GitHub Actions
- Live: t.me/Sandy67_Bot

Émilie Atelier — Brand & UI/UX design collaboration — Figma, Canva, Adobe Illustrator

- Delivered invitation, branding, and social media designs for a creative design studio

SKILLS

Languages: Java, Python, JavaScript, SQL, HTML/CSS

Backend: Spring Boot, Spring Security, REST APIs, JWT Authentication, Data Modeling

Databases & Tools: PostgreSQL, Git, GitHub, GitHub Actions, Postman

Design: Figma, Canva, Adobe Illustrator, Adobe Premiere

LANGUAGES

Arabic — Native | **English** — Fluent | **Russian** — Professional Working Proficiency
